POLYCARBONATE SCREWJACK PEDESTAL

SUPPORT<sup>PC</sup> pedestals are designed to transform terraces into functional living spaces by supporting fire-resistant surface materials like ceramic and glass. Ideal for a variety of outdoor settings, they provide a practical and cost-effective solution by preventing water pooling, leveling sloped surfaces, and reducing structural loads. With over 20 years of global experience, SUPPORT<sup>PC</sup> pedestals are ISO 9001:2008 certified and made from environmentally friendly materials.

POLYCARBONATE SCREWJACK PEDESTAL

## SPECIFICATIONS

The Support PC Pedestal, made of polycarbonate, benefits from the material's density of 1.20 g/cm<sup>3</sup> and its high durability, withstanding temperatures from -100°C to +135°C and melting at 270-380°C. Classified as B1 (non-combustible) under GB 8624-2012, polycarbonate is non-flammable, self-extinguishing, and does not emit toxic gases when burned, making it an environmentally friendly choice for this product.
